

What is the point of Quality Assurance?

What is the point of including students in Quality Assurance?

Where are students needed in QA?

What structures, training, and support are needed for students to participate meaningfully in QA?

just ethical approval and evaluator training

information about current QA system, training to participate in reviews (just as for other experts)

Students organizations, adequate training HE and QA, equal rights, financial means, regulations

Structure of study programs that allows activities beyond study and support student engagement.

Student organizations, Universities

Knowing their role in the process!

The same as others

Round tables, training sessions etc. at HEI and agencies

Training and support.

What skills and attitudes do students need to contribute effectively in QA processes?
