Introduction

AI is fundamental to teaching, learning, and research (Bretag, 2016).

Promoting AI boosts the quality of an institution's educational provision:

by maintaining six fundamental values (ICAI, 2021).

Prepare individuals to contribute to society in an ethical manner (ENAI Academic Integrity Policies WG, n.d.).

A culture of academic integrity and sustainable change are achieved by designing and implementing effective policies (Morris, 2016).

HE AI Policies

Policies should be carefully developed and implemented with the collaboration of all stakeholders.

Serious problems with policies in many European HE institutions (e.g., Glendinning et al., 2022).

These policy deficiencies can be a threat to the realisation of AI and the quality of educational outcomes.

Fundamental dimensions of policies:

- detecting AI breaches,
- reacting to unacceptable academic conduct, and
- promoting academic integrity.

Many policies focus on the detection and reaction dimensions.

The most frequent type of AI breach in HE is plagiarism, but contract cheating is a growing threat.

Student conduct can be influenced sustainably:

- by raising the awareness level of all stakeholders in HE institutions.

Policies should prioritise education and deterrence, for creating and maintaining a sustainable culture of AI.

Project Result 1-Outputs/Steps

CREATING AND DISSEMINATING
AN HEAI POLICY/GUIDELINE FOR GOOD PRACTICE

- Collecting policies
- Tagging them
- Storing and making the corpus available to the wider public

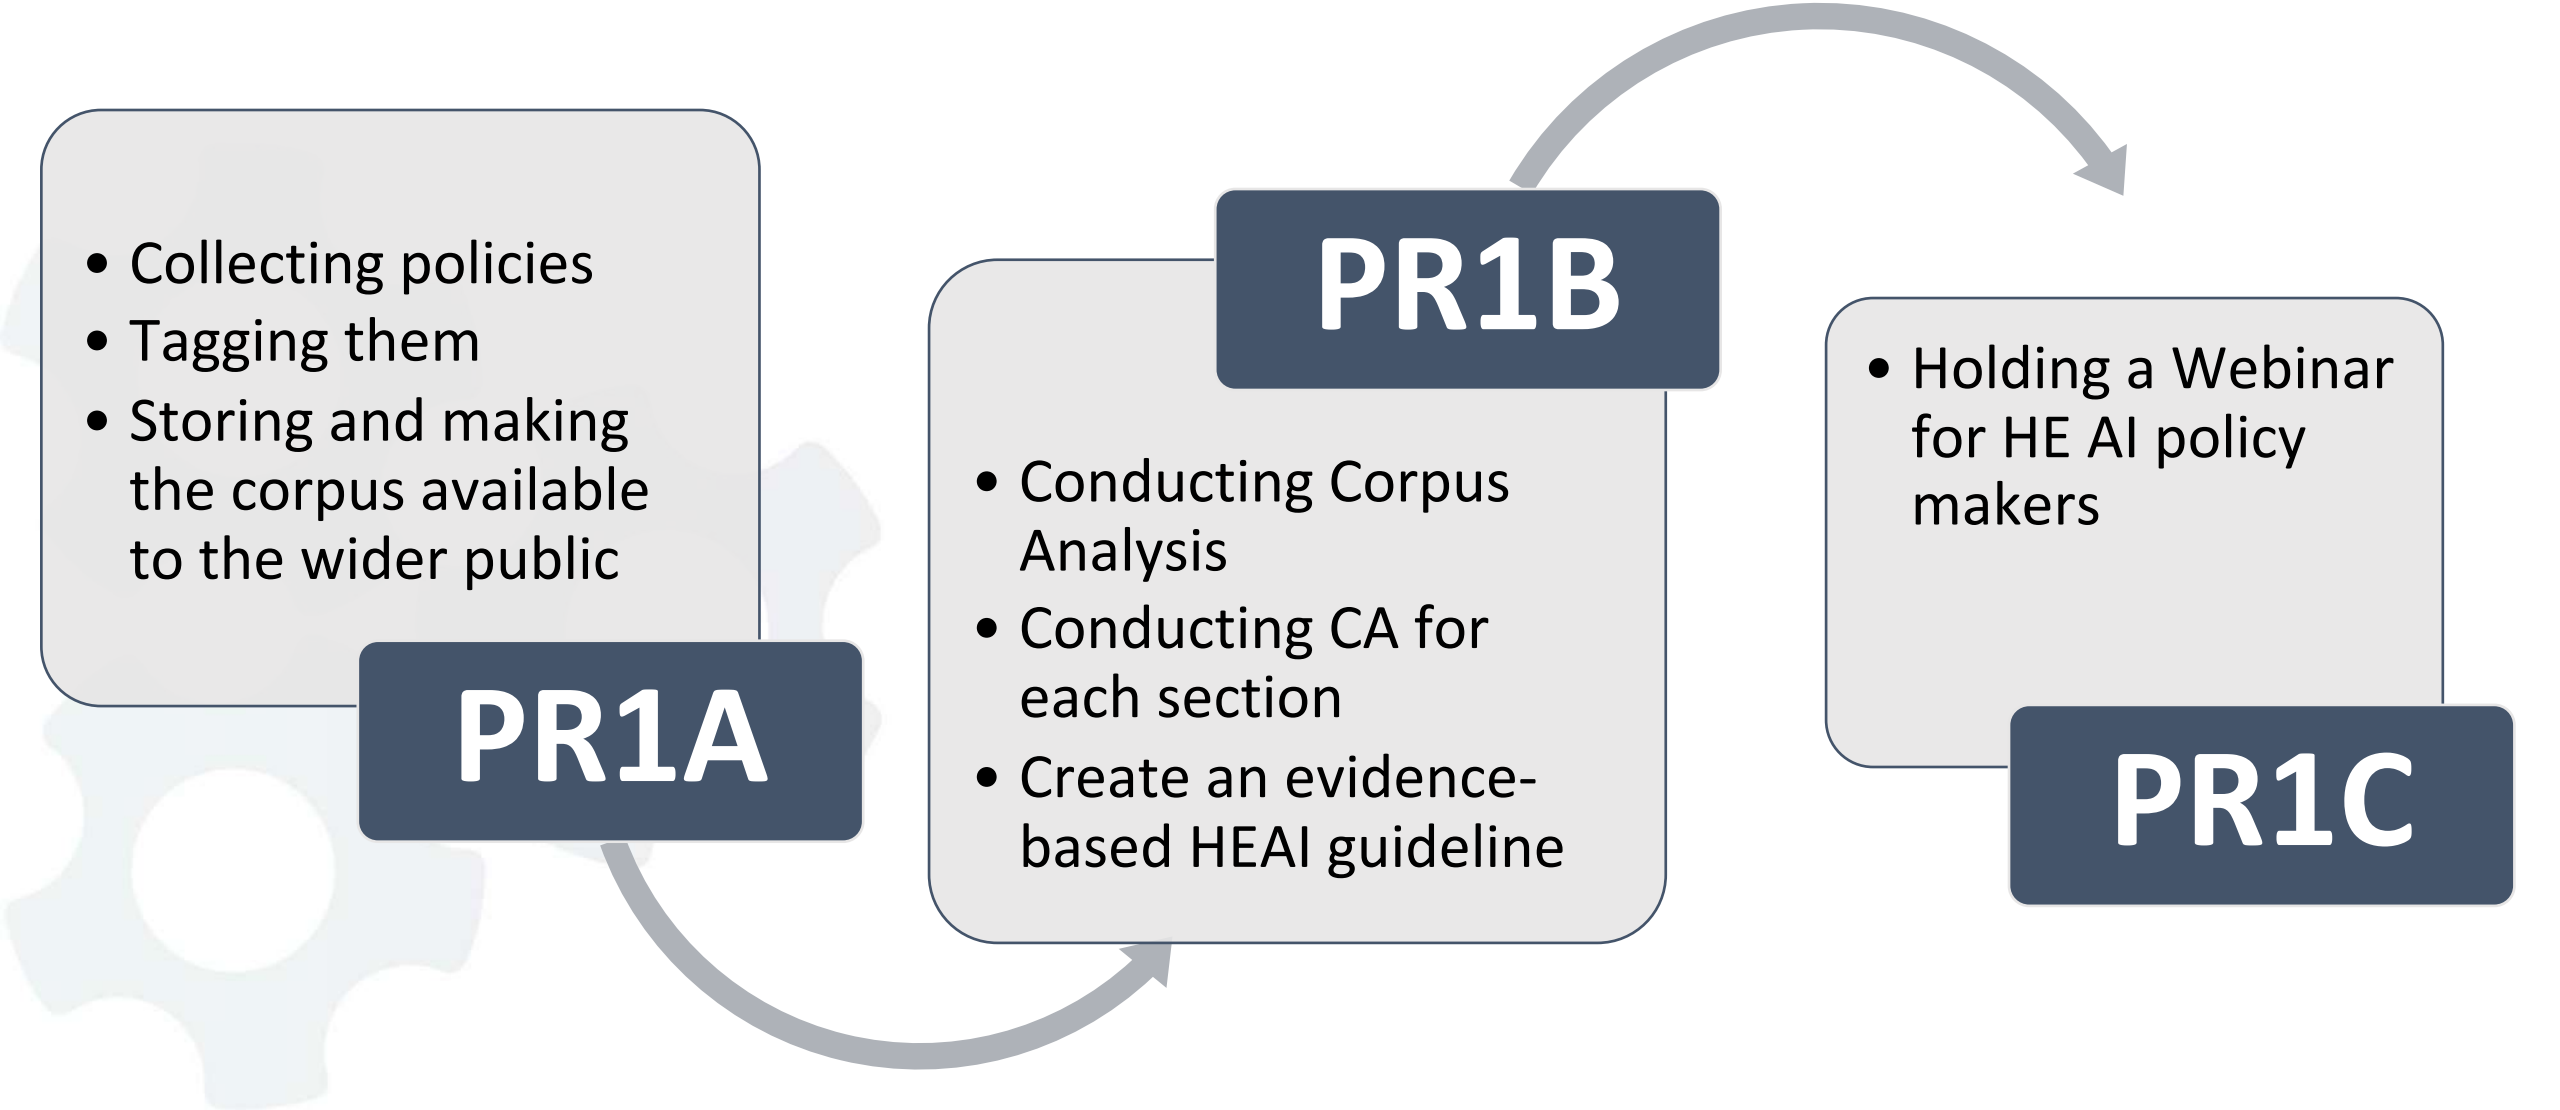

PR1A

- Conducting Corpus Analysis
- Conducting CA for each section
- Create an evidence-based HEAI guideline

PR1B

- Holding a Webinar for HE AI policy makers

PR1C

Project Result 2

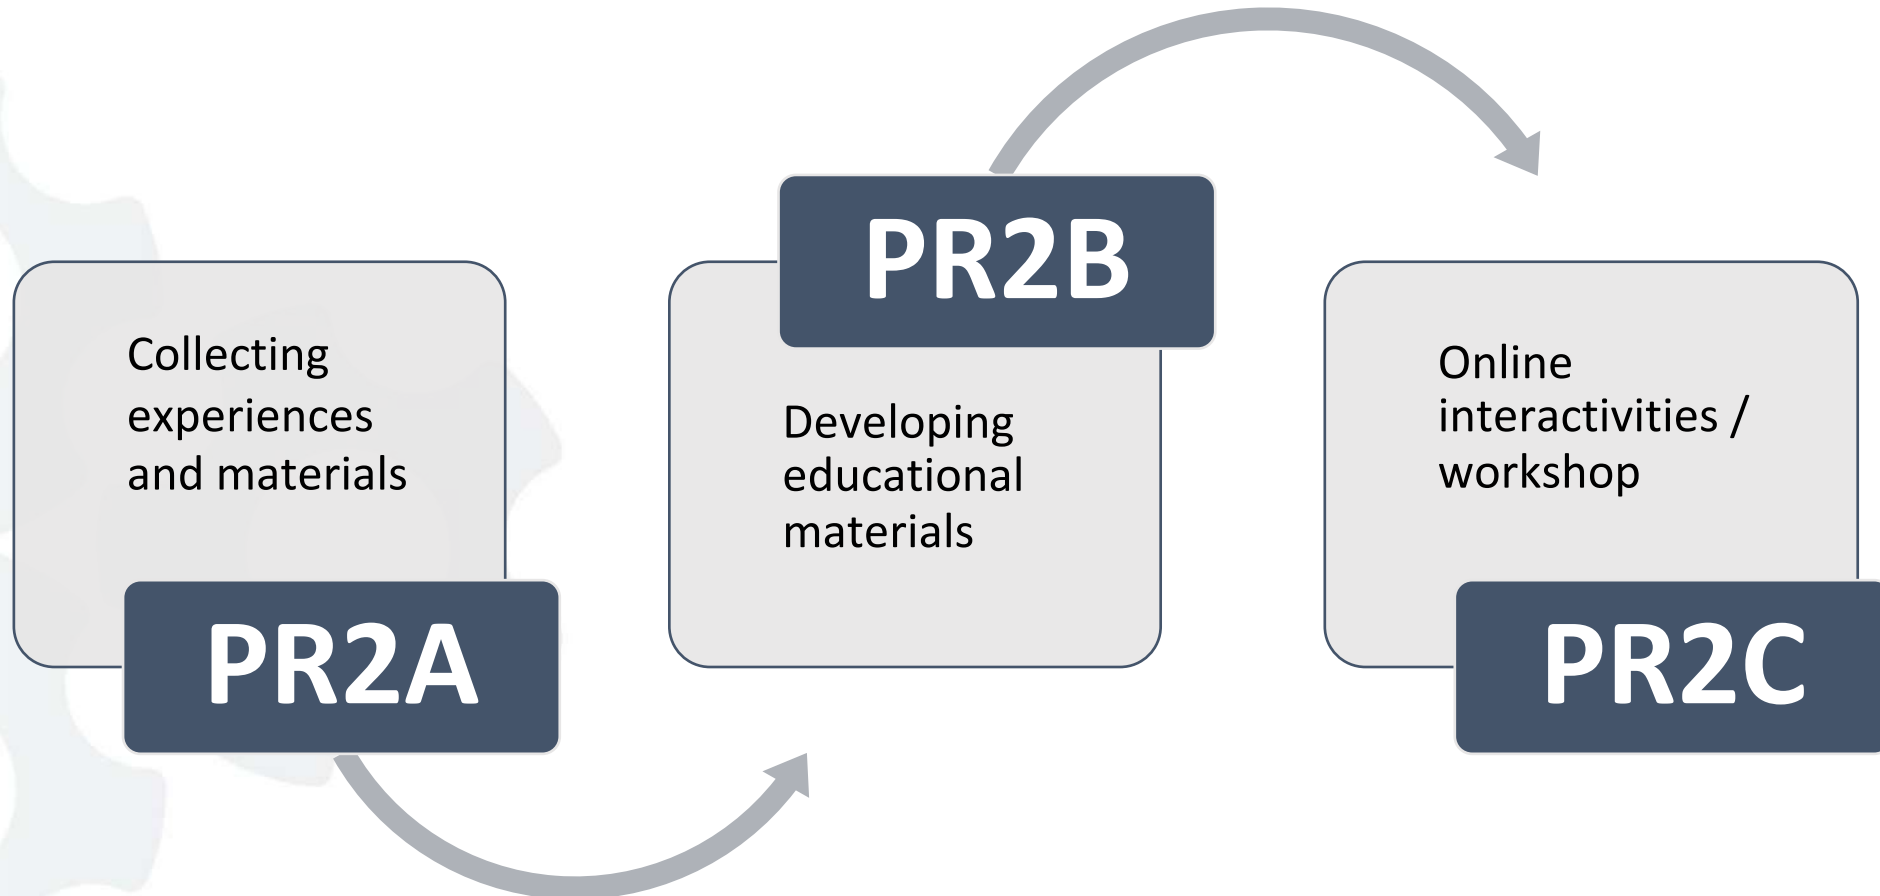

Proactive approach to deter academic misconduct

To design evidence-based guidance and training materials
on how to prevent, to detect, and deter
academic misconduct
