

SKVC launches a call for international reviewers

SKVC is kindly seeking nominations of experts to serve on procedures during second half of 2022 and in the first half of 2023.

According to the current regulations, an external evaluation will address seven evaluation areas: study aims and learning outcomes; link between research (artistic activities) and teaching; student admission and support; learning outcomes and employability of graduates; teaching staff; material resources; internal quality assurance, improvement and provision of public information. For each upcoming study field evaluation SKVC gathers an independent expert panel whose tasks are (1) to analyse self-evaluation reports prepared by HEIs, (2) go to visits to HEIs and, afterwards, (3) prepare reports based on which an accreditation decisions will be issued.

SKVC is regularly revising its expert database with the aim to attract (a) scholars (representing different subject paradigms) from different countries; (b) educators having good knowledge of contemporary teaching and student assessment methods; (c) scientists with significant research and publishing experience; (d) competent specialists of higher education management and administration. **SKVC invites the potential candidates, falling under the abovementioned categories, to apply for study field evaluations in the nearest future.**

Study fields, to be evaluated and accredited **in the second half of 2022**, are the following: **Aerospace Engineering, Anthropology, Archaeology, Design, Finance, Geology, Heritage Studies, Materials Technology, Measurement Engineering, Media Art, Medicine, Microbiology, Philology, Rehabilitation, Safety Engineering.**

Study fields, to be evaluated and accredited in the first half of 2023 are the following: **Natural Resource Technology, Maritime Engineering, Maritime Technology, Dentistry, Law, Management, Public Health, Public Catering, Human Geography.**

Quality assurance agencies are invited to propose the potential candidates for the above indicated study fields, sending to SKVC (e-mail address: kokybe@skvc.it) the name, surname, represented study field and contact of an individual expert. Alternatively, we would be grateful if quality assurance agencies could post this announcement on their websites or circulate via their mailing lists to institutions and individuals who served as reviewers.

Interested experts can also nominate themselves by filling the application form on SKVC website: <https://www.skvc.it/default/en/quality-assurance/call-for-experts>.

Nominations of experts for evaluations of study fields for the second half of 2022 are expected until August 31. Experts who applied later will be included in the SKVC Expert database after considering the suitability of their applications.
